

Northern New England METROPOLITAN MEDICAL RESPONSE SYSTEM

Maine • New Hampshire • Vermont

It is not the intention of Maine Strike Team to create a situation whereby a community becomes medically underserved due to an exodus of volunteer healthcare providers in a time of emergency or disaster. Even in a time of emergency or disaster, members of the Maine Task Force One hold a primary responsibility and obligation to provide medical care within their local community.

The employee listed below is a mission critical member of the Maine Task Force One and without his or her availability the safety of a deployment may be compromised. We ask that you make the employee listed below available to deploy with the Medical Strike Team, in times of emergency or disaster, for a period of three days at all times.

For the purposes of worker's compensation and long-term disability, members of the Maine Task Force One will be registered as volunteers with the Maine Emergency Management Agency. Upon activation of the Maine Task Force One, or during training activities, they will become State Employees for liability as well as worker's compensation and disability purposes (37-B MRSA § 822-823).

Please contact the Maine Task Force One Team Commander at (207) 795-2960 with any questions.
